

Luke Snavelly

766 Route 68, New Brighton, PA

(724) 494 – 8876 | lsnavelly28@gmail.com | www.linkedin.com/in/LukeSnavelly | <https://lukesnavelly.github.io/>

EDUCATION

Robert Morris University (RMU), Moon Township, PA

- M.S. in Data Science, B.S. in Data Science and Statistics, Minor in Data Analytics
- GPA: 4.0 / 4.0

Expected: Spring 2027

TECHNICAL SKILLS

- **Technical:** R (tidyverse, ggplot2, randomForest), Python (pandas, NumPy), SQL, Tableau, Power BI, Excel
- **Analytics:** Statistical Modeling, Machine Learning, Data Visualization, Regression, Clustering

EXPERIENCE

Operations Analytics Intern – Duquesne Light Company, Pittsburgh

Spring 2026 – Summer 2026

- Analyzed the efficiency and data accuracy of planned customer and company-initiated power outages over a three-month project and presented findings to executive leadership
- Built a Python scheduling tool to extract work order dates from an Excel sheet for bulk upload into a database system
- Conducted statistical analyses examining the relationship between outside temperature and pole transformer failures

Assistant Manager – Fun Fore All, Cranberry Twp.

Spring 2021 – Spring 2026

- Managed a staff of up to 15 employees while coordinating daily operations and resolving customer and technical issues

Data Science & Analytics Research Assistant – Carnegie Mellon University

Summer 2025

- Studied statistical modeling and visualization techniques for R in a distinguished summer research program
- Developed a quantile regression model to quantify effort for NFL players and presented findings at CMU's Sport Analytics Conference

PROJECTS & AWARDS

ASA DataFest 2026 – Best Overall Analysis, Master's Track

Spring 2026

- Collaborated on a three-person team to analyze healthcare data in R during a weekend-long data analysis competition

Cleveland Cavaliers Hackathon – 1st Place

Fall 2025

- Developed ticket pacing curves using two seasons of Cleveland Cavaliers ticket sales data to forecast future game sales and identify games at risk of missing sales targets
- Built an interactive R Shiny dashboard that allowed business professionals to monitor ticket sales against projected pacing in real time

MLB Two-Strike Approach Clustering Analysis - "Outstanding Sports Analytics" Award

Spring 2025

- Conducted a k-means clustering analysis to group MLB hitters based on their two-strike hitting abilities and presented findings at the 5th Annual Ohio State Sports Analytics Conference

RMU Sport Analytics Club Data Jam 2024 – 1st Place

Spring 2024

- Analyzed approximately one million rows of college sports ticket sales data in Excel and developed visualizations to identify trends and inform conclusions

LEADERSHIP & ACTIVITIES

Sport Analytics Club – President

Fall 2023 - Present

- Lead and organize club meetings that showcase current sport analytics and statistical programming methods
- Organize club participation in sports analytics competitions and conferences, including the Cleveland Cavaliers Hackathon and Carnegie Mellon Sports Analytics Conference

RMU Club Soccer – President

Fall 2023 - Present

- Organize practices, coordinate games, and lead a student organization of club soccer players
- Coordinate game schedules with opposing teams and recruit new players throughout the academic year

Other Activities – Data Analytics Club, Honors Program Scholar, & First-Year Honors Mentor
